PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8819

SESSION NUMBER: 3

DATE OF SESSION: 890109

DATE OF REPORT: 890118

START: 1340

END: 1460

METHODOLOGY: CRV

VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: Describe the specific mission/activities/personnel/equipment of target area E.
2. (S/NF/SK) VIEWER TASKING: Coordinates and instructions to turn attention to area E; viewer started the session in stage 4.
3. (S/NF/SK) COMMENTS: Session may have been affected by a strong viewer AI due to the EI of a worker's horror. This session may have AOL in the first half because of this. The viewer appeared to be more on track during the second half of the session, after his unobjectified AI dissipated.
4. EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY  
SPECIAL ACCESS REQUIRED

## memorandum

DATE: 9 January, 1989

REPLY TO  
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/NF/SS)  
SG1J

TO: DT-S (ATTN: [REDACTED])

1. (S/NF/SK) Statistics:

Viewer:	018
Session date:	9 JAN 89
Start time:	1340
End time:	1416
Mode of operation:	CRV
Monitor:	095
PI:	Queasy stomach
AV:	None

2. (S/NF/SK) Cuing: Encrypted coordinates: 696910/136160 and "Access and describe 'Area E'."

3. (S/NF/SK) Results:

a. The general area is a complex of buildings of different sizes and shapes, but with similar outward appearance. A portion of these buildings are fenced in and separate from the rest of the complex, but still a part of the complex, nevertheless. The entire session's impressions came from buildings within this fencing.

b. The first part of Area E had a male person doing "research" on people who work at the "plant", outside his office area.

1) His work was perceived as placing patches on the workers' arms, and smearing an amount of strong irritant on the skin under the patch. Some kind of injections are also given, but this was not seen to be part of the "research".

2) The plant personnel involved in this "research" appear to have no choice about being involved, and do not like it. There was strong EI of horror at what was being done to them.

3) The "strong irritant" was perceived as a strong concentration of the same irritant with which the workers come into contact in their daily work. It was also perceived as being radioactive. I had the personal impression that the "irritant" in the working environment, as well as the testing, itself, would cause permanent damage to the workers.

c. The prompt to jump around Area E was given, in order to find the "purpose" for the area. Several things were found in this search:

1) A building dedicated to paperwork. This area also had the feel of "money" about it.

~~SECRET~~ NOFORN

2) One building had a feel of "storage". There was also an area of this building which was extremely cold.

3) Skipping around, I found a worker working outside one building, carrying goods from one place to another. When I queried him as to the purpose of the place, he returned a mental image of the pallets of powdery material he was moving, and a very large O.D. colored missile rising to a vertical position.
